

Fire-Steel®

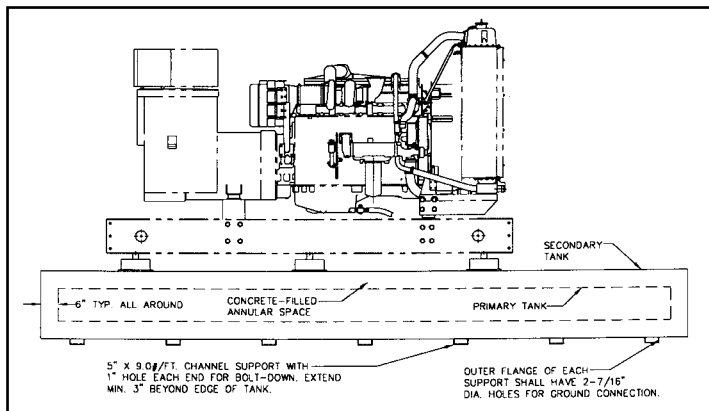

Patented Fire-Rated Generator Sub-Base Fuel Tanks

- UL Special Purpose Tank, listed and labeled Protected Secondary Containment Generator Base Tank (investigated using UL 2085).
- Two-hour fire rating, ballistics tested and vehicle impact resistant.
- Double-walled steel generator sub-base tank using lightweight concrete vaulted secondary containment system.
- Designed for environmental extremes with earthquake and hurricane tie-down restraint points and drillings for ground device attachment.
- Warranty includes primary and secondary tank systems as well as concrete vaulting.
- The Fire-Steel® sub-base tank allows for smaller site footprint and lower installation cost than stand-alone vaulted tanks.
- Generator sets weighing up to 61,900 pounds, with or without enclosures, may be mounted on top.
- Phoenix's coating system passed a 20,000-hour salt spray test and is in use in highly corrosive environments, including offshore oil platforms.

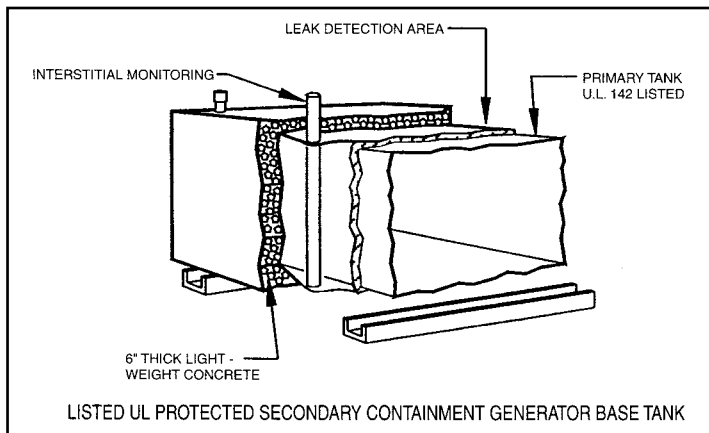

FIRE-STEEL®

Fuel Storage Protection You Can Depend On

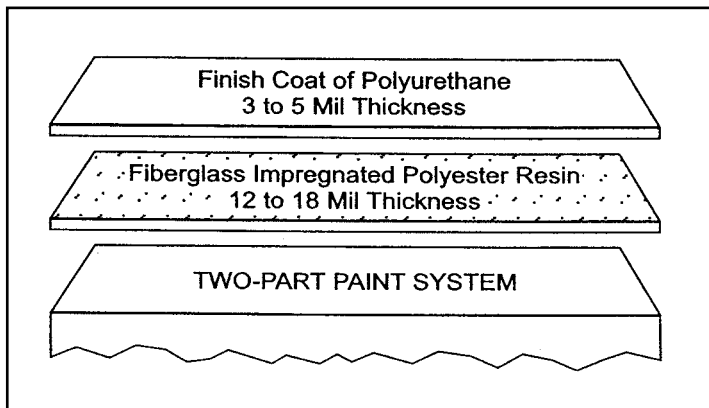

Finally – the fire protection for generator fuel storage tanks that you've been looking for! Available only from Phoenix Products, a leader in tank fabrication, patented Fire-Steel® is designed for ultimate protection and durability.

- Listed UL Special Purpose Tank
- NFPA 30, 30A, 37 & 110
- Custom Fabrication to 13,500 Gallons
- Through-tank Stub-up
- No cross beams required to mount generator

- Over-spill protection available
- Stainless steel fittings and protrusions
- Designed to meet or exceed national and local codes
- Available in sizes from 300 gallons to 13,500 gallons
- Two (2) steel tanks separated by six (6) inches of concrete for fire and impact resistance
- Full-scale fire tested
- Projectile tested
- Vehicle impact tested
- 30-year warranty
- Patent No. 6,026,975
